Thank you for choosing the travelling recorder!

Besides general functions of the recorder, this machine has three new main features:

1) Built-in double lens can be used to take two images at front and back at the same time;
2) Newly added GPS module can record the whole driving track. Using random specialized software, you can see the video at computer, at the same time connect Google map through the Internet. Driving track shows on the map and you can trace the running route of the vehicle.
3) Built-in gravity sensor G-Sensor can record the gravity sensing information. Using random specialized software, you can see the video at computer, at the same time read the gravity sensing data to trace accident and abnormal circumstance occurred in the running process.

In order to maximize the performance of the recorder, please read this instruction manual carefully before use (This machine and accessories for the design and specifications are subject to change without prior notice).
Begin to use travelling recorder

Battery Charging
There are two methods for battery charging:
1. Using USB line to connect the machine with the computer for charging;
2. Using accessory vehicle-mounted power source for charging.
In the whole process of charging, charging indicator lights up in red. When the charging is finished, indicator automatically extinguishes. The whole charging process takes about 240 minutes.

Insert a memory card
Insert TF (Micro SD) memory card straightly into the slot in accordance with the indicating direction on the machine body until hear a “Ka” sound.
Remove card: Push the TF card inside and the card will pop up. Then you can remove.

Notice:
- When using the memory card for the first time, since the format of the memory card is not compatible with the machine, you must use the machine or attached tool software ( ) to format the memory card (The formatting of the memory card by computer is not supported). Formatting will permanently delete all the data on the memory card, including the protected image, which can not be restored. Therefore, before formatting the memory card, please back up important data.
- If you can’t use the machine to format the memory card format, please use attached software ( ) on a computer.

Adjust the positions of the lens
The front lens of this machine can be turned 20 degrees up and down in order to better meet the recorder fixed position and get better shooting.

Turn on and turn off
Turn on: press power supply once for a relative long time until red ON indicator lights up.
Turn off: press power supply once more time for a relative long time until red ON indicator extinguish.

Notice:
When in low battery, the travelling recorder will prompt automatic off because of low battery.

Basic operations of the travelling recorder

Change operating mode
This machine has two operating modes: pickup and playback.
Press MODE button to change between them.

Setup menu
Press MENU button to enter MENU page. now the column of “Menu setting” is in blue background.
In the menu setting page, click left and right keys to select the required setting fields; click “OK” button to accept the settings, again presses the MENU key to exit the menu.

7 Delete document:
Select the video file not needed and click to delete the selected video file.
8 Kit:
Kit can proceed as follows. SD card formatting / upload software to the SD card / SD card speed test / map selection and user password setting.
Click to enter the kit.

9. Google map:
Click and the computer will connect to Google map via Internet and show travelling path on the map. You can trace the travelling path of the vehicle.

The Dashcam Store
10. Gravity sensor:
Click the video on the computer, at the same time read and display the gravity sensing data, trace accident and abnormal circumstance occurred during the driving process.
11. Other operations:
Click the video from left to right, and following operations can be realized: repair film / unlock protection / choose to display size.

Reset of this machine
When abnormal circumstance occur due to improper operation, you can press reset button and then restart the machine, now the machine can return to normal.

Product characteristics
- Ultra small volume; the front lens with ultra wide angle of 140 degrees can be rotated up and down 20 degrees; the back lens with ultra wide-angle of 120 degrees high resolution; this perfect modular design is more convenient for various angle and high resolution video shooting.
- Built-in 1/4 inch low-noise and high-quality photographic element can capture ultra clear picture in a dark place.
- Built-in lithium battery with charging and meanwhile recording function.
- Built-in microphone/speaker.
- Support high-capacity Micro TF Card
- Automotive turning on and recording function when the vehicle start.
- With a delayed start function to prevent transient pulse current damage machine at the moment the vehicle start.
- GPS scanning and positioning.
- Gravity induced SENSOR.
